

# COMMODITY MANAGEMENT INNOVATION

**Allegro is a leading provider of CTRM software for power and gas utilities, refiners, producers, traders and other commodity consumers.**

Allegro is built on a simple, yet powerful, premise: to provide commodity professionals with position management, portfolio optimization, risk mitigation and the potential for greater profits. Our software is designed with our customers in mind, and that's why we focus on what matters to them - trading, risk management, physical logistics, regulatory compliance and accounting.

Your goal is operational success, every day. To achieve it, you'll require the right commodity trading and risk management partner. You need the name with more than three decades of experience. You need the industry leader who promises innovation, expertise and alignment with your business.

That's Allegro, the only partner for today and tomorrow.
